Summary of Experience

I have over a decade of experience engineering software and in that time i have developed countless products, libraries, websites, chrome extensions, an AI email response service valued at \$10M with 10,000+ users, developed 3D experiences in leading metaverse platforms, and provided data analysis for Baltimore City's policy decisions. I am passionate about solving complex problems with innovative technical solutions.

Work History

Software Developer, AutoApply 03/2024 - 06/2024

- Developed AI Chrome Extension for automating form filling (React, Sqlite).
- Engineered backend database infrastructure and implemented CI/CD pipeline (Docker, Cron).
- Self-hosted private cloud services, managing domains and SSL/TLS configurations.

Chief Technology Officer, Addy-Ai 05/2023 - 02/2024

- Co-founded AddyAI, scaling it to 10,000+ users, achieving a \$10M valuation.
- Developed Langdrive, an open-source LLM finetuning solution.
- Led AI safety evaluations and adversarial testing to ensure model security.

Software Developer, Voxels.com 03/2022 - 05/2023

- Led blockchain development and integrated real-time video streaming in metaverse environments.
- Collaborated on site redesigns and system architecture documentation.
- Volunteered as a metaverse development instructor and HackaTRON judge.

Lecturer, National Science Foundation 01/2020 - 11/2021

- Taught *Python for Big Data* to graduate students, mentoring data science projects.

Web Developer, Baltimore Neighborhood Indicators Association 01/2017 - 11/2021

- Generated key quality of life statistics for Baltimore City, supporting policy decisions.
- Developed tools like the Equity Tracker and VitalSigns to track DEI efforts and community trends.
- Administered and enhanced the organization's web presence (WordPress, PHP, SQL).

Freelance Developer 2009 - Present

- Developed AI-driven and blockchain-based systems for diverse clients, including law firms and major brands, and gardeners.
- Created GPT Watch, an Android app for querying ChatGPT, and engineered CryptoTrader, achieving 40x returns in one year.

Education

MS and BS in Information Systems University of Maryland Baltimore County, 2016, 2020

Awards

GitHub Open-Source Accelerator alumni AddyAI, 2024
Venture Bridge Alumni, Carnegie Mellon Accelerator AddyAI, 2023

Skills

Node/JavaScript/TypeScript, Python, SQL, NoSQL, HTML, CSS, Bash, PHP, Java and C++, React, Pre-act, Redux, Webpack, Cron, PM2, SSH, Docker, Latex, Docker-Compose, Nginx, HTTPS, SSL/TLS, SystemD, LetsEncrypt, Express, Passport, Apache, Flask, Git, Docker, Heroku, Digital Ocean, WordPress, AWS Lambda, EC2, S3, Google Cloud Console, Bootstrap, Ionic, Tailwind, Styled Components, Google APIs, Cloudflare, Firebase, OAuth2, Twilio, Jira, Esri, Socrata, Leaflet, PostGIS, PostgreSQL, MySQL, SQLite, Redis, GraphQL, Leaflet, D3, Babylon, Three, Matplotlib, Seaborn, Vega, Plotly, Altair, TensorFlow, ONNX, OpenAI, Gradio, Ollama, HuggingFace, Langchain, Numpy, Pandas, OpenSeas, Solidity, Ethers, Infura, Alchemy, Web3, CircleCI, Figma
